- > The supports above are shown assembled in the **Excellent steel** Groups (see preceding pages) for which it is possible to calculate the total weight by adding them to the weight of the TR screw using the table on page 127.
- > Using the **mobile support LX without Supports Base** it is necessary to ensure that the same holes are provided as for supports **DXA** and **DXB** (see preceding pages).
- > To comply with safety regulations it is obligatory to use the locking tabs, the fitting hardware supplied, and ensuring that the arrows engraved in the supports are all facing in the same direction, which for vertical/oblique movements must be facing downwards.
